EXPERIENCE

FREELANCE
2019 - NOW

I am a front-end developer with experience working on Ukrainian freelance platforms. I am proficient in developing web applications using HTML, CSS, and JavaScript, including responsive design. I am familiar with libraries and tools such as MJML, Sass, Bootstrap, and jQuery.

I am currently self-learning React/Redux through freeCodeCamp. I am ready to use my skills and experience to contribute to project development, improve, and bring value to the team. I am open to new challenges and willing to learn.

I am looking for opportunities to grow
as a front-end developer and ready to join your company to collaborate on projects!

LANGUAGE

Ukranian - native

English (Intermediate)
